Daryna Buzovska

Senior/Lead Java Developer

If you read this CV you've already made a great choice to contact me. What you need to know, I'm a Senior/Lead Java Engineer with strong experience in developing SpringBoot RESTful applications based on microservices architecture, as well as in many other adjacent technologies and concepts. Also, I played role of Design Lead and Scrum Master over 2 years on previous project, so I have good management skills as well. Solving challenging problems gives me a great sense of achievement and I strive to keep my code clean, secure and tested as much as possible.

💼 EXPERIENCES

AIO Senior Java Developer   08.2024 - now

Senior Java Developer at AIO, working for a small startup, which works with financial institutions and helps to manage documents. My responsibilities include developing new microservices and supporting old ones, communication with clients, handling urgent issues, release process, making a decision for architectural solutions, code review, testing. Tech stack: Java 17, SpringBoot, Microservices, MongoDB, Kafka, Kubernetes, Helm, Terraform, AWS, Docker, Kibana.

GlobalLogic Senior/Lead Java Developer   02.2021 - 07.2024

Senior Java Developer at GlobalLogic, working for a multinational networking and telecommunications company. The main muscle that was pumped up - is to work with anything of any complexity and uncertainty. My responsibilities include developing new microservice, making decision for architectural solutions, writing unit, integration and functional tests, code review, task refinement, writing documentation, presenting a product, Scrum process, managing team and project, etc. Tech stack: Java 11, SpringBoot, Microservices, PostgreSQL, OpenApi, Kubernetes, Helm, Docker.

ELECTA Middle Java Developer   04.2020 - 01.2021

Middle Java Developer at Electa, a British SaaS start-up for political campaign management. My responsibilities included developing new features, supporting existing functionality, writing unit tests, code review, code refactoring, API development for both mobile and web client, writing SQL scripts, web pages crawling. Tech stack: Java 8, SpringBoot, Microservices, MongoDB, MariaDB, Kubernetes, Docker, Kafka.

"CMORE Automotive" via Upwork Java Developer   02.2019 - 10.2019

External Freelance Java Developer at CMORE Automotive, a German software company for car navigation system (via Upwork). Except regular code writing and bug fixing, I was also responsible for adapting geo location in MongoDB to AWS and designed auto-generated tests with Xtend for Python. Tech stack: Java 8, Microservices, MongoDB, Xtend, Python.

Upwork Freelance Java Developer   09.2018 - 01.2019

Worked with xml conversion, Lotus Notes, data crawling with Jsoup and file parsing, which helped to automate the manual processes to a company.

SPD-Ukraine, Cherkasy Junior Java Developer   05.2018 - 08.2018

Java Developer in SPD-Ukraine, PitchBook. Worked with Java 8, Spring, PostgreSQL, MS SQL, Git, Apache Tomcat, Gradle. During this period I fixed various types of bugs, starting from the simplest typo bugs and ending with cache problems. Also I implemented small new features and refactored old code.
