MIDDLE JAVA DEVELOPER

If you read this CV you've already made a great choice to contact me. What you need to know, I'm a Middle Java Engineer with strong experience in developing SpringBoot RESTful applications based on microservices architecture, as well as in many other adjacent technologies and concepts. Solving challenging problems gives me a great sense of achievement and I strive to keep my code clean and tested as much as possible.

EXPERIENCES

Middle Java Developer
"GlobalLogic"   02.2021 - present

Middle Java Developer at GlobalLogic, working for a multinational networking and telecommunications company. My responsibilities includes developing new microservice, making decision for architectural solutions, writing unit, integration and functional tests, code review, task refinement, presenting of a product, etc. Tech stack: Java 11, SpringBoot, Microservices, PostgreSQL, OpenApi, Kubernetes, Docker.

Middle Java Developer
"ELECTA"   04.2020 - 01.2021

Middle Java Developer at Electa, a British SaaS start-up for political campaign management. My responsibilities included developing new features, supporting existing functionality, writing unit tests, code review, code refactoring, API development for both mobile and web client, writing SQL scripts, web pages crawling. Tech stack: Java 8, SpringBoot, Microservices, MongoDB, MariaDB, Kubernetes, Docker, Kafka.

Java Developer
"CMORE Automotive" via Upwork   02.2019 - 10.2019

External Freelance Java Developer at CMORE Automotive, a German software company for car navigation system (via Upwork). Except regular code writing and bug fixing, I was also responsible for adapting geo location in MongoDB to AWS and designed auto-generated tests with Xtend for Python. Tech stack: Java 8, Microservices, MongoDB, Xtend, Python.

Freelance Java Developer
Upwork   09.2018 - 01.2019

Worked with xml conversion, Lotus Notes, data crawling with Jsoup and file parsing. Here my **profile** for more details.

Java Developer
SPD-Ukraine, Cherkasy   05.2018 - 08.2018

Java Developer in SPD-Ukraine, **PitchBook**. Worked with Java 8, Spring, PostgreSQL, MS SQL, Git, Apache Tomcat, Gradle. During this period I fixed various types of bugs, starting from the simplest typo bugs and ending with cache problems. Also I implemented small new features and refactored old code.
